STAE

Data Warehouse | Core Features

Improve your workflows and performance.

Integrate

Standardize and share data across departments and vendors.

- Access 40+ preloaded city data schemas with the option to create and customize your own.

- Import data from various sources including file uploads, dynamic APIs, and ETL processes.

- Support multiple file formats including SHP, JSON, and CSV.

Monitor

Set digital regulations with customized notifications and alerts.

- Draw geographic boundaries and track when data sources intersect.

- Track data as it changes in real-time with automated alerts to enforce compliance and fines.

- Import data via API from vendors to monitor performance in real-time.

Visualize

Create custom dashboards and data cards to track insights and visualize data quickly.

- View any spatial data as heatmaps or time-series graphs, and quickly share map views as URLs with your team.

- Access dozens of pre-existing visualizations for common data types such as shared vehicles, 311 issues, and traffic.

Collaborate

Export to popular tools, publish open data, and create custom APIs.

- Export data to several common platforms such as Power BI, Tableau, and Carto.

- Integrate any data into other systems and workflows via a Push API.

- Add and set access permissions for co-workers and external partners to collaborate.

"I want the flexibility to integrate pretty much anything. That's one of the things I like about Stae."

- Sam Edelstein, Chief Data Officer | City of Syracuse
